UMVC Gene Therapy Plasmids

Aldevron has assembled a comprehensive Gene Therapy and DNA Vaccine plasmid library. We offer expression plasmids designed for human clinical trials as well as plasmids encoding immunostimulatory and secretion sequences. Each vector can be produced in milligram to gram amounts according to your needs. The plasmids offered by Aldevron have been utilized extensively in the Gene Therapy and DNA vaccine community.

Combine any of these vectors with Aldevron's custom plasmid purification service for qualified pDNA at any scale and for many applications.
