

# pALD Lentivirus Products

The pALD Lenti product line of pALD-Rev, pALD-VSV-G and pALD-GagPol packaging plasmids offer the highest quality, optimized for any recombinant lentiviral vector production.

- High-titer, high-infectivity lentiviral vector production
- In-stock availability of Research grade and GMP-Source™
- Codon optimized with minimization of backbone and HIV/HSV homology
- Royalty free, for all uses

Clients will be able to provide their gene of interest and Aldevron will clone the construct into the lentivirus expression plasmid for custom production.

**Contact Aldevron today for more information or to order a free sample.**
