

pALD-Lenti System Quick Guide

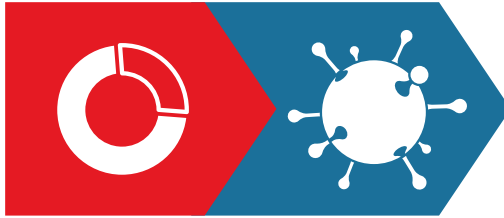

Expression and packaging plasmids for high-titer, lentiviral vector production. Available for Research Grade through commercial applications.

✓ **In-Stock** ✓ **Royalty Free** ✓ **Available Now!**

A solution from early research through commercial development

With our pALD Lenti system, you choose the quality grade that fits your needs and stage of development, with the assurance that these **royalty-free products** will be available when needed.

The system has been optimized and represents the state of the art in lentiviral vector production, including:

- **Codon optimization of pALD-Rev, pALD-VSV-G, pALD-Lenti**
- **Vector backbones minimized**
- **Minimization of homology with HIV/VSV**
- **Minimization of inter-cassette homology**
